

The Advisors' Inner Circle Fund

WESTWOOD
HOLDINGS GROUP, INC.®

Westwood Market Neutral Income Fund

Summary Prospectus | March 1, 2017

Ticker: Institutional Shares — WMNIX

Before you invest, you may want to review the Fund's complete prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <http://www.westwoodfunds.com/literature/RegulatoryDocuments.aspx>. You can also get this information at no cost by calling 1-877-386-3944, by sending an e-mail request to westwoodfunds@seic.com, or by asking any financial intermediary that offers shares of the Fund. The Fund's prospectus and statement of additional information, both dated March 1, 2017, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website, phone number or e-mail address noted above.

FUND INVESTMENT OBJECTIVE

The investment objective of the Westwood Market Neutral Income Fund (the "Fund") is to seek to generate positive total returns in all market conditions through a combination of current income and capital appreciation.

FUND FEES AND EXPENSES

These tables describe the fees and expenses that you may pay if you buy and hold Institutional Shares of the Fund.

Shareholder Fees (fees paid directly from your investments)

Redemption Fee (as a percentage of amount redeemed, if shares redeemed have been held for less than 30 days)	1.00%
--	-------

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Institutional Shares
Management Fees	0.85%
Other Expenses	<u>2.42%</u>
Shareholder Servicing Fees	0.11%
Dividend and Interest Expenses on Securities Sold Short	0.11%
Other Operating Expenses	2.20%
Total Annual Fund Operating Expenses	3.27%

	Institutional Shares
Less Fee Reductions and/or Expense Reimbursements ¹	<u>(1.96)%</u>
Total Annual Fund Operating Expenses After Fee Reductions and/or Expense Reimbursements	1.31%

¹ Westwood Management Corp. (the “Adviser”) has contractually agreed to reduce fees and reimburse expenses in order to keep Total Annual Fund Operating Expenses for Institutional Shares (excluding interest, taxes, brokerage commissions, Dividend and Interest Expenses on Securities Sold Short, acquired fund fees and expenses, and extraordinary expenses (collectively, “excluded expenses”)) from exceeding 1.20% of the Fund’s Institutional Shares’ average daily net assets until February 28, 2018. In addition, if at any point Total Annual Fund Operating Expenses (not including excluded expenses) are below the expense cap, the Adviser may receive from the Fund the difference between the Total Annual Fund Operating Expenses (not including excluded expenses) and the expense cap to recover all or a portion of its prior fee reductions or expense reimbursements made during the preceding three-year period during which this Agreement (or any prior agreement) was in place. This Agreement may be terminated: (i) by the Board of Trustees (the “Board”) of The Advisors’ Inner Circle Fund (the “Trust”), for any reason at any time; or (ii) by the Adviser, upon ninety (90) days’ prior written notice to the Trust, effective as of the close of business on February 28, 2018.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses (including one year of capped expenses in each period) remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$133	\$823	\$1,537	\$3,433

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the example, affect the Fund’s performance. During its most recent fiscal year, the Fund’s portfolio turnover rate was 99% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund employs a market neutral investment strategy, which means that the Fund seeks to earn a positive return in all market conditions, by maintaining a portfolio that is designed to have low volatility and low correlations with the general stock and bond markets.

In seeking to achieve its goals, the Fund invests primarily in income producing convertible securities. Convertible securities include, but are not limited to, corporate bonds, debentures, notes or preferred stocks and their hybrids that can be converted into (exchanged for) common stock or other securities, such as warrants or options, which provide an opportunity for equity participation. The Fund may also invest in equity securities and non-convertible fixed income securities, and may invest in securities of any market capitalization, maturity, duration or credit quality, including securities rated below investment grade or, if unrated, deemed by the Adviser to be of comparable quality (“junk bonds”). The Fund may invest in foreign companies in both developed and emerging markets, and will generally have exposure to the United States, Europe and Asia.

The Fund seeks to exploit certain arbitrage opportunities by, for example, selling common stocks or bonds short against positions in which the Fund has invested in convertible securities, or establishing short positions in convertible securities with long positions in the corresponding common stock or bond. When the Fund sells a security short, it is selling a security it does not own. The Fund may invest in derivative instruments, such as futures contracts, forward contracts, options and swaps (including credit default swaps) to seek to hedge risks such as issuer, equity market, credit, interest rate and foreign currency risks, or enhance the returns of the Fund. The Fund may also seek to generate income from option premiums by writing (selling) call and put options on individual securities, broad-based securities indexes or exchange-traded funds (“ETFs”).

The Adviser seeks to identify undervalued convertible securities by utilizing quantitative tools and fundamental research to assess a security’s income characteristics, liquidity, credit quality, volatility and equity value. The Adviser seeks to invest in companies with strong business models, quality management, and favorable financial conditions. The Adviser will consider selling a convertible security when it believes that the security is no longer undervalued, or there are unfavorable changes in the fundamentals of the underlying company or the structure of the convertible security. The Fund may buy and sell securities frequently, which could result in a high portfolio turnover rate.

When the Adviser believes that market conditions are unfavorable for profitable investing, or is otherwise unable to locate attractive investment opportunities, it may increase the Fund's investments in cash or money market instruments to protect the Fund's assets and maintain liquidity. When the Fund's investments in cash or money market instruments increase, it may not participate in market advances or declines to the same extent that it would if the Fund remained more fully invested in equity and fixed income securities.

PRINCIPAL RISKS

As with all mutual funds, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency.** The principal risk factors affecting shareholders' investments in the Fund are set forth below.

Convertible Securities Risk – The value of a convertible security in which the Fund invests is influenced by changes in interest rates (with investment value declining as interest rates increase and increasing as interest rates decline) and the credit standing of the issuer. The price of a convertible security will also normally vary in some proportion to changes in the price of the underlying common stock because of the conversion or exercise feature.

Fixed Income Risk – Fixed income securities are subject to a number of risks, including credit and interest rate risks. Credit risk is the risk that the issuer or obligor will not make timely payments of principal and interest. Changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may also affect the value of the Fund's investment in that issuer. The Fund is subject to greater levels of credit risk to the extent it holds below investment grade debt securities, or "junk bonds." Interest rate risk is the risk that the value of a fixed income security will fall when interest rates rise. In general, the longer the maturity and the lower the credit quality of a fixed income security, the more likely its value will decline. Risks associated with rising interest rates are heightened given that interest rates in the U.S. are at, or near, historic lows.

High Yield Bond Risk – The Fund may invest in high yield bonds (often called "junk bonds"), which are debt securities rated below investment grade. Junk bonds are speculative, involve greater risks of default, downgrade, or price declines and are more volatile and tend to be less liquid than investment-grade securities. Companies issuing

high yield bonds are less financially strong, are more likely to encounter financial difficulties, and are more vulnerable to adverse market events and negative sentiments than companies with higher credit ratings.

Equity Risk – Since it purchases equity securities, the Fund is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Fund’s equity securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response.

Preferred Stock Risk – Preferred stocks in which the Fund may invest are sensitive to interest rate changes, and are also subject to equity risk, which is the risk that stock prices will fall over short or extended periods of time. The rights of preferred stocks on the distribution of a company’s assets in the event of a liquidation are generally subordinate to the rights associated with a company’s debt securities.

Warrants Risk – Warrants in which the Fund may invest are instruments that entitle the holder to buy an equity security at a specific price for a specific period of time. Warrants may be more speculative than other types of investments. The price of a warrant may be more volatile than the price of its underlying security, and an investment in a warrant may therefore create greater potential for capital loss than an investment in the underlying security. A warrant ceases to have value if it is not exercised prior to its expiration date.

Foreign Securities Risk – Investing in foreign securities poses additional risks since political and economic events unique to a country or region will affect those markets and their issuers. These risks will not necessarily affect the U.S. economy or similar issuers located in the United States. In addition, investments in foreign securities are generally denominated in a foreign currency. As a result, changes in the value of those currencies compared to the U.S. dollar may affect (positively or negatively) the value of the Fund’s investments. These currency movements may occur separately from, and in response to, events that do not otherwise affect the value of the security in the issuer’s home country. Securities of foreign companies may not be registered with the U.S. Securities and Exchange Commission (the “SEC”) and foreign companies are generally not subject to the regulatory controls imposed on U.S. issuers and, as a consequence, there is

generally less publically available information about foreign securities than is available about domestic securities. Income from foreign securities owned by the Fund may be reduced by a withholding tax at the source, which tax would reduce income received from the securities comprising the Fund's portfolio. Foreign securities may also be more difficult to value than securities of U.S. issuers.

Foreign Currency Risk – As a result of the Fund's investments in securities or other investments denominated in, and/or receiving revenues in, foreign currencies, the Fund will be subject to currency risk. Currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar, in which case, the dollar value of an investment in the Fund would be adversely affected.

Regional Focus Risk – To the extent that it focuses its investments in a particular geographic region, the Fund may be more susceptible to economic, political, regulatory or other events or conditions affecting issuers and countries within that region. As a result, the Fund may be subject to greater price volatility and risk of loss than a fund holding more geographically diverse investments.

Emerging Markets Securities Risk – The Fund's investments in emerging markets securities are considered speculative and subject to heightened risks in addition to the general risks of investing in foreign securities. Unlike more established markets, emerging markets may have governments that are less stable, markets that are less liquid and economies that are less developed. In addition, the securities markets of emerging market countries may consist of companies with smaller market capitalizations and may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible restrictions on repatriation of investment income and capital. Furthermore, foreign investors may be required to register the proceeds of sales, and future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization or creation of government monopolies.

Large-Capitalization Company Risk – The large capitalization companies in which the Fund may invest may lag the performance of smaller capitalization companies because large capitalization companies may experience slower rates of growth than smaller capitalization companies and may not respond as quickly to market changes and opportunities.

Small- and Mid-Capitalization Company Risk – The small- and mid-capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger,

more established companies. In particular, investments in these small- and mid-sized companies may pose additional risks, including liquidity risk, because these companies tend to have limited product lines, markets and financial resources, and may depend upon a relatively small management group. Therefore, small- and mid-cap stocks may be more volatile than those of larger companies. These securities may be traded over-the-counter or listed on an exchange.

Short Sale Risk – A short sale involves the sale of a security that the Fund does not own in the expectation of purchasing the same security (or a security exchangeable therefore) at a later date at a lower price. Short sales expose the Fund to the risk that it will be required to buy the security sold short (also known as “covering” the short position) at a time when the security has appreciated in value, thus resulting in a loss to the Fund. Investment in short sales may also cause the Fund to incur expenses related to borrowing securities. Reinvesting proceeds received from short selling may create leverage which can amplify the effects of market volatility on the Fund and, therefore, the Fund’s share price. Theoretically, uncovered short sales have the potential to expose the Fund to unlimited losses.

Derivatives Risk – The Fund’s use of futures contracts, forward contracts, options and swaps is subject to market risk, leverage risk, correlation risk, hedging risk and liquidity risk. Market risk is the risk that the market value of an investment may move up and down, sometimes rapidly and unpredictably. Leverage risk is the risk that the use of leverage may amplify the effects of market volatility on the Fund’s share price and may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. Correlation risk is the risk that changes in the value of the derivative may not correlate perfectly or at all with the underlying asset, rate or index. Hedging risk is the risk that derivatives instruments used for hedging purposes may also limit any potential gain that may result from the increase in value of the hedged asset. To the extent that the Fund engages in hedging strategies, there can be no assurance that such strategy will be effective or that there will be a hedge in place at any given time. Liquidity risk is described below. The Fund’s use of forwards and swaps is also subject to credit risk and valuation risk. Credit risk is the risk that the counterparty to a derivative contract will default or otherwise become unable to honor a financial obligation. Valuation risk is the risk that the derivative may be difficult to value. Each of these risks could cause the Fund to lose more than the principal amount invested in a derivative instrument.

ETF Risk – ETFs are pooled investment vehicles, such as registered investment companies and grantor trusts, whose shares are listed and traded on U.S. and non-U.S. stock exchanges or otherwise traded in the over-the-counter market. To the extent that the Fund invests in ETFs, the Fund will be subject to substantially the same risks as those associated with the direct ownership of the securities comprising the index on which the ETF is based or the ETF's other holdings and the value of the Fund's investment will fluctuate in response to the performance of the underlying index or holdings. ETFs typically incur fees that are separate from those of the Fund. Accordingly, the Fund's investments in ETFs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the ETFs' operating expenses, in addition to paying Fund expenses. Because the value of ETF shares depends on the demand in the market, shares may trade at a discount or premium to their net asset value and the Adviser may not be able to liquidate the Fund's holdings at the most optimal time, which could adversely affect the Fund's performance.

Money Market Instruments Risk – The value of money market instruments may be affected by changing interest rates and by changes in the credit ratings of the investments. An investment in a money market fund is not a bank deposit and is not insured or guaranteed by any bank, the FDIC or any other government agency. Certain money market funds float their net asset value while others seek to preserve the value of investments at a stable net asset value (typically, \$1.00 per share). An investment in a money market fund, even an investment in a fund seeking to maintain a stable net asset value per share, is not guaranteed and it is possible for the Fund to lose money by investing in these and other types of money market funds. If the liquidity of a money market fund's portfolio deteriorates below certain levels, the money market fund may suspend redemptions (i.e., impose a redemption gate) and thereby prevent the Fund from selling its investment in the money market fund or impose a fee of up to 2% on amounts the Fund redeems from the money market fund (i.e., impose a liquidity fee). These measures may result in an investment loss or prohibit the Fund from redeeming shares when the Adviser would otherwise redeem shares. Money market funds and the securities they invest in are subject to comprehensive regulations. The enactment of new legislation or regulations, as well as changes in interpretation and enforcement of current laws, may affect the manner of operation, performance and/or yield of money market funds.

Market Neutral Strategy Risk – The Fund's market neutral strategy may cause the Fund to underperform compared to equity or fixed income markets or other mutual funds that do not utilize a market

neutral strategy. For example, in rising markets, the Fund’s short positions may significantly impact the Fund’s overall performance and cause the Fund to underperform or sustain losses. Periodic underperformance is to be expected and is a result of the Fund’s overall hedging techniques employed for the market neutral strategy. Additionally, there is a risk that the Adviser will be unable to construct a portfolio that limits the Fund’s exposure to market movements, and as a result, the Fund’s performance may reflect general market movements.

Portfolio Turnover Risk – Due to its investment strategy, the Fund may buy and sell securities frequently. Such a strategy often involves higher expenses, including brokerage commissions, and may increase the amount of capital gains (in particular, short-term gains) realized by the Fund. Shareholders may pay tax on such capital gains.

Liquidity Risk – Certain securities may be difficult or impossible to sell at the time and the price that the Fund would like. The Fund may have to lower the price, sell other securities instead or forgo an investment opportunity, any of which could have a negative effect on Fund management or performance.

PERFORMANCE INFORMATION

The bar chart and the performance table below illustrate the risks of an investment in Institutional Shares of the Fund by showing the Fund’s Institutional Shares’ performance for the 2016 calendar year and by showing how the Fund’s Institutional Shares’ average annual total returns for 1 year and since inception compare with those of a broad measure of market performance. Of course, the Fund’s past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future. Updated performance information is available on the Fund’s website at www.westwoodfunds.com or by calling 1-877-FUND-WHG (1-877-386-3944).

Average Annual Total Returns for Periods Ended December 31, 2016

This table compares the Fund's Institutional Shares' average annual total returns for the periods ended December 31, 2016 to those of an appropriate broad-based index.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts ("IRAs").

Westwood Market Neutral Income Fund – Institutional	1 Year	Since Inception (5/1/15)
Fund Returns Before Taxes	5.23%	3.13%
Fund Returns After Taxes on Distributions	4.20%	1.67%
Fund Returns After Taxes on Distributions and Sale of Fund Shares	2.98%	1.76%
Citigroup 1-Month U.S. Treasury Bill Index (reflects no deduction for fees, expenses, or taxes)	0.21%	0.13%

For information about related performance, please see the "Related Performance Data of the Adviser" section of the Prospectus.

INVESTMENT ADVISER

Westwood Management Corp.

PORTFOLIO MANAGERS

Mr. David Clott, CFA, Senior Vice President, has managed the Fund since its inception in 2015.

Mr. Shawn Mato, CFA, Senior Vice President, has managed the Fund since its inception in 2015.

PURCHASE AND SALE OF FUND SHARES

To purchase shares of the Fund for the first time, you must invest at least \$5,000. There is no minimum for subsequent investments.

If you own your shares directly, you may redeem your shares on any day that the New York Stock Exchange is open for business by contacting the Fund directly by mail at Westwood Funds, P.O. Box 219009, Kansas City, MO 64121-9009 (Express Mail Address: Westwood Funds, c/o DST Systems, Inc., 430 West 7th Street, Kansas City, MO 64105) or telephone at 1-877-FUND-WHG (1-877-386-3944).

If you own your shares through an account with a broker or other institution, contact that broker or institution to redeem your shares. Your broker or institution may charge a fee for its services in addition to the fees charged by the Fund.

TAX INFORMATION

The Fund intends to make distributions that may be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account (“IRA”), in which case your distribution will be taxed when withdrawn from the tax-deferred account.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
