

STRATEGY DESCRIPTION

The Emerging Markets Fund primarily invests in the common stocks of companies located (or with primary operations) in emerging markets. The Fund holds between 70-90 equity investments with market capitalizations above USD \$500 million. The strategy has diversified exposure to the best global investment opportunities, located or primarily engaged in emerging market countries, with risk controls limiting position sizes and country exposure. The strategy invests in businesses that we believe are mispriced and that can generate positive and sustainable earnings growth which could enable superior economic profits over time.

INVESTMENT PHILOSOPHY

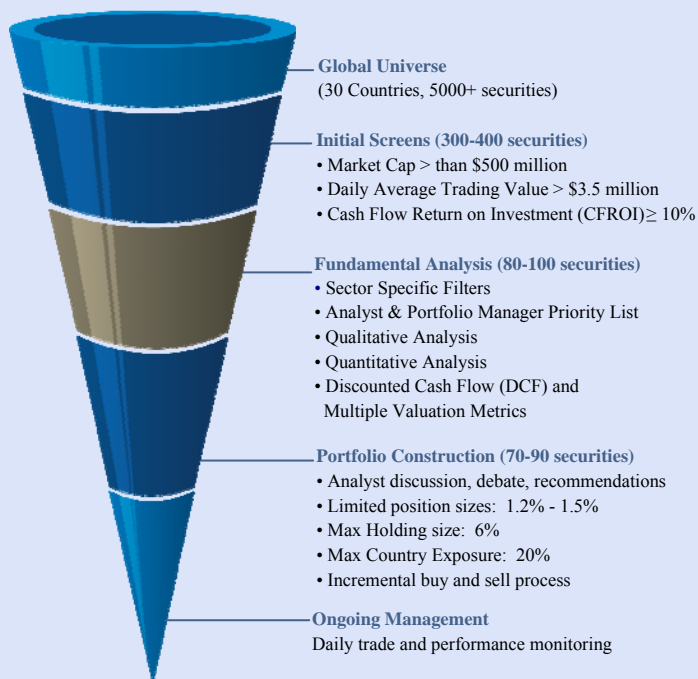

We invest in businesses that we believe are mispriced and can generate positive and sustainable earnings growth, thus potentially achieving economic profits over time.

INVESTMENT APPROACH

Bottom-up stock selection process based on key characteristics:

- Management aligned with the creation of positive economic profit
- Strong business franchise
- Cash flow generation above peer group
- Consistency of earnings growth
- Ability, or prospective ability, to pay dividends

ABOUT WESTWOOD

Westwood was founded in 1983 out of a fierce commitment to give investors trustworthy investment solutions. Today, we are entrusted with \$22.1 billion¹ in client assets from both institutional and individual investors in a range of strategies including U.S., emerging market and global equities, global convertible securities, master limited partnerships (MLPs), and multi-asset income. We are focused on achieving excellent long-term results and outstanding service, and we seek to do so by aligning our interests with those of our clients through significant, broad-based employee ownership of our parent company, Westwood Holdings Group, Inc., which trades on the New York Stock Exchange under the symbol "WHG". Based in Dallas, Westwood also maintains investment teams in Toronto and Boston.

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted.

Mutual fund investing involves risk, including possible loss of principal. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principals or from social, economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. The Fund uses derivatives. The primary risk of derivative instruments is that changes in the market value of securities held by the fund and of the derivative instruments relating to those securities may not be proportionate. Derivatives are also subject to illiquidity and counterparty risk. In addition, REIT investments are subject to the changes in economic conditions, credit risk and interest rate fluctuations. Investments in smaller companies typically exhibit higher volatility.

To determine if this fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expenses before investing. This and other information can be found in the Fund's summary and full prospectuses, which may be obtained by calling 1.877.FUND.WHG, or by visiting our website at www.westwoodfunds.com. Read the prospectus carefully before investing or sending money .

The MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. The Benchmark Index's returns do not reflect any management fees, transaction costs, or expenses. Investors cannot invest directly in an index.

Return on Equity (ROE) - The amount of net income returned as a percentage of shareholders equity. Return on equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested. **Return on Assets (ROA)** - An indicator of how profitable a company is relative to its total assets. ROA gives an idea as to how efficient management is at using its assets to generate earnings. It is calculated by dividing a company's annual earnings by its total assets. **Return On Invested Capital (ROIC)** - A calculation used to assess a company's efficiency at allocating the capital under its control to profitable investments. The return on invested capital measure gives a sense of how well a company is using its money to generate returns. Comparing a company's return on capital with its cost of capital reveals whether invested capital was used effectively. P/E ratio is price-per-share divided by its earnings-per-share. EV/EBITDA is a comparison of enterprise value and earnings before interest, taxes, depreciation and amortization.

The Westwood Emerging Markets Fund is distributed by SEI Investments Distribution Co., which is not affiliated with the Advisor.
